

QUICK GUIDE WINTER WHEELS

2016 - 2017

This quick guide contains details on Volvo Cars' range of winter wheels – article numbers, tyre dimensions, available tyre /rim combinations per model etc.

NEW! FOUR WHEELS = ONE PART NUMBER

Please note that from now on, each part number is for a set of four wheels, and not for single wheels as was previously the case.

TYRE SERVICE LIFE

Driving style and speed affects the product life of tyres by roughly 30%. Seasonal differences account for 30%, car type 20% and the remaining 20% depends on the type of road surface and the inherent durability of the tyre. In some cases, an aggressive driving style can account for 100% of the wear on the tyre. Please note that the wear on winter tyres increase if they are used when it gets warm.

TREAD DEPTH/ SPEED	NEW TYRE 8 MM	SAFETY RECOMMENDATION TREAD 4 MM	WORN OUT 1.6 MM
75 KM/H	 74%	 58%	 16%
125 KM/H	 57%	 11%	 6%

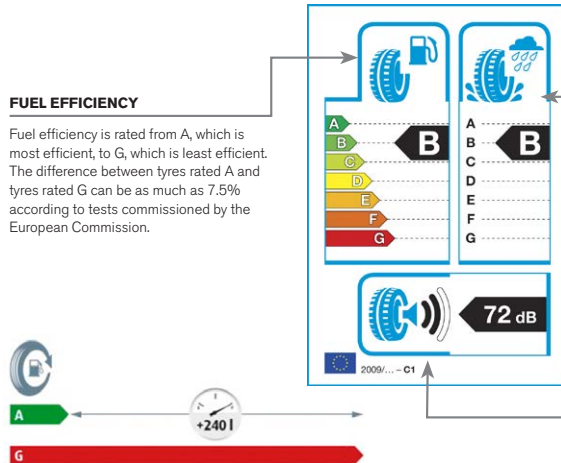

The tyre's area of contact with the road surface when there's 3 mm of water on the road.

THE EU TYRE LABELLING

Tyre labels is mandatory within the European Union.

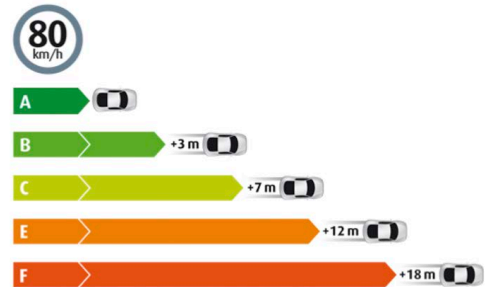

FUEL EFFICIENCY

Fuel efficiency is rated from A, which is most efficient, to G, which is least efficient. The difference between tyres rated A and tyres rated G can be as much as 7.5% according to tests commissioned by the European Commission.

WET GRIP

The braking distance could differ as much as 30%, which means up to 18 metres for an average car travelling at a speed of 80 km/h.

EXTERIOR NOISE

The rating is marked by a pictogram where the number of black sound waves indicates how the tyre performs compared to the new European tyre noise levels that will be introduced in 2016.

1 black sound wave already 3 dB below the future European limit.
 2 black sound waves already compliant with the future European limit.
 3 black sound waves compliant with the current European limit.
